DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-10, 30-40 and 43 are rejected under 35 U.S.C. 102(e) as being anticipated by *Moore et al* USPN 6,349,404.

Regarding claims 1, 4 and 30

Moore et al teaches

Art Unit: 2124

- identifying and modeling one or more business processes with one or more steps to each said business process and identifying data relating to each step (figure 3, column see summary of the invention, column 7, lines 1-10);
- designing and creating one or more independent set of software services with each database being shared by said software services (figures 1-2, column 5, lines 25-35);
- designing and creating at least one database for storing data database being shared by software services (figures 1-2, column 5, lines 25-35);
- using one or more computer software applications to access and process the data through the one or more components (column 9, lines 57-67), and
- using an interactive electronic terminal to allow a user to access and operate the software applications and access data (figures 3-4, column 9, lines 10-17).

Regarding claims 2, 3, 5, 32, 35 and 40

Moore et al teaches

Initiation, visualization, specification; design and implementation (figures 3-6, column 7, lines 1-10).

Regarding claims 6-8

Moore et al teaches

Including step of providing communication between the hub and each of the plurality of components (figures 2-3, column 6, lines 37-54).

Regarding claims 9, 10, 33, 34, 36 and 37

Moore et al teaches

Step of identifying data further includes a step of using legacy systems (see summary of the invention, column 5, lines 13-24, column 6, lines 50-65).

Regarding claims 31 and 43

Moore et al teaches

The step of producing computer software includes only data from a known project (column 6, lines 57-67).

Regarding claims 38 and 39

Moore et al teaches

Step of developing a class diagram (figure 4, column 11, lines 49-67).
